

## QUESTION BANK ON BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY

- Q.1-What are the types of cement?
- Q.2-What is OPC and PPC cement?
- Q.3-Which is better OPC or PPC?
- Q.4-What are grades of cement?
- Q.5-What do you mean by mortar?
- Q.6-What is type of mortar?
- Q.7Write sources of sand.
- Q.8What is bulking of sand?
- Q.9-What is the formula for bulking of sand?
- Q.10-Defination of concrete.
- Q.11-What are the types of foundation?
- Q.12-What is Shallow foundation?
- Q.13-Why are bricks used?
- Q.14-What is the size of brick?
- Long Types
- Q.15-Define classification of Rock.
- Q.16-what is classification of igneous rocks?
- Q.17-Explain characteristics of good building stones.
- Q.18-Define dressing of stone.
- Q.19-Explain ten uses of stones in the construction industry.
- Q.20--Explain Importance of stone in construction.
- Q.21-What is bricks and its types?
- Q.22-What is brick earth and its composition?
- Q.23-What are the steps in brick preparation?
- Q.24-What is bricks and its classification?
- Q.25-What are the qualities of a good building brick?
- Q.26-Explain Manufacturing of cement.
- Q 27- Explain Classification of sand.
- Q.28-Explain Concept of foundation and it's purpose.
- Q.29-Explain Classification of walls – load bearing, non-load bearing walls, retaining walls.
- Q.30-Explain different components of building.
